

SOLUTION BRIEF

Cribl LogStream™

SOLUTION BRIEF

Cribl LogStream™

Making choices to optimize observability usually involves tradeoffs between budget, flexibility, and visibility; LogStream helps you to make the best choices while mitigating or removing those undesired consequences.

THE CHALLENGE

Data volumes are growing, and organizations are being asked to analyze new types of data without blowing up their budgets or adding new staff and infrastructure.

THE SOLUTION

LogStream helps you parse, restructure, and enrich data in flight. Get the right data, where you want, in the formats you need. **Pay less to analyze more data.**

THE BENEFITS

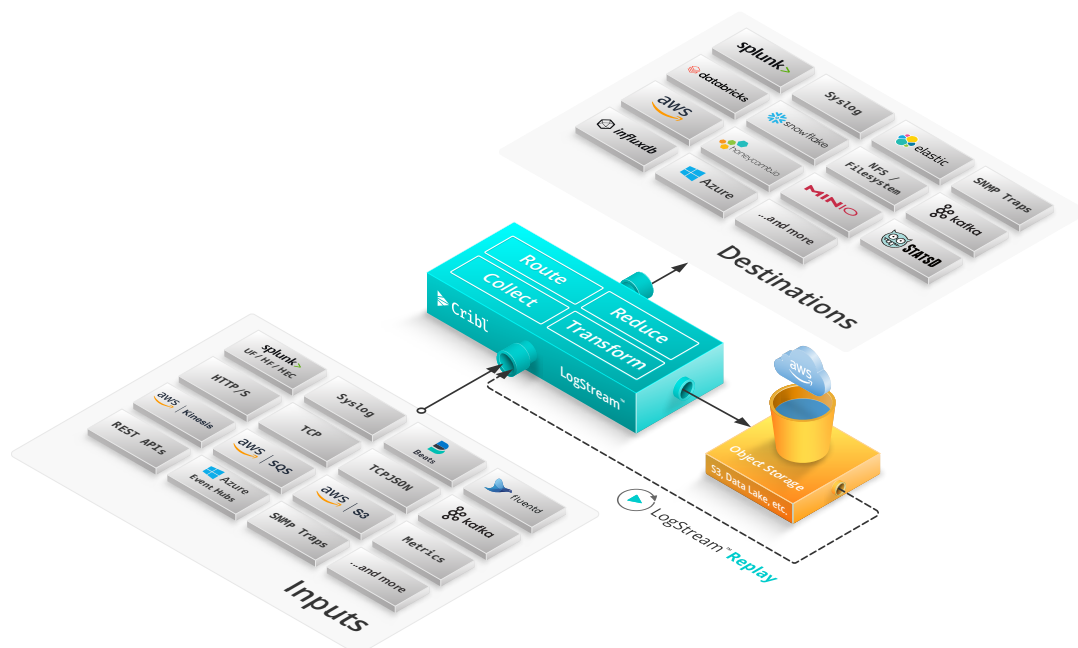

- Full Control of Your Data
- Platform Independence
- Improved Time to Insight
- Cost Reduction

The Challenge

Data is growing year over year, and at the same time companies are trying to analyze new sources of data to get a complete picture of their IT and Security environments. They need flexibility to get data into multiple tools from multiple sources but don't want to add a lot of new infrastructure and agents. These companies need a better strategy for retaining data long term that is also cost effective.

The Cribl Solution

LogStream allows you to implement an observability pipeline which helps you parse, restructure, and enrich data in flight - before you pay to analyze it. Get the right data, where you want, in the formats you need:

CRIBL HELPS YOU GET
THE DATA YOU WANT,
IN THE FORMATS YOU
NEED, TO WHEREVER
YOU WANT TO GO.

Facets of Cribl LogStream™

DATA ROUTING

Send data to the most effective destinations including low-cost storage locations like S3 for long term retention. Route data to the best tool for the job – or all the tools for the job – by translating and formatting data into any tooling schema you require. Let different departments choose different analytics environments without having to deploy new agents or forwarders.

DATA REDUCTION

Reduce as much as 50% of ingested log volume to control costs and improve system performance. Eliminate duplicate fields, null values, and any elements that provide little analytical value. Filter and screen events for dynamic sampling, or aggregate log data into metrics for massive volume reduction. Do all of this without worry: You can keep a full fidelity copy in a low-cost destination and replay it back if needed.

DATA COLLECTION

LogStream is the best way to get multiple data formats into your analytics tools. Use the LogStream universal receiver to collect from any machine data source – and even to schedule batch collection from multiple APIs. In addition, recall data from low-cost storage to replay logs to analytics tools for later investigations with ad-hoc data collection.

DATA SHAPING

Shape all of the data you need to drive decisions about your environment. Translate and transform data from all of your sources to the tools you choose. Get a more complete picture of your data by enriching logs with third-party data. LogStream collects data from all of your sources and shapes it into actionable logs and metrics for analysis.

DATA MANAGEMENT AND MONITORING

Reduce management overhead, with a robust and easy-to-use GUI-based configuration and testing interface. Capture live data and monitor your observability pipeline in real time. Gain further visibility into your data.

Summary

Cribl unlocks the value of machine data by giving you the power to make choices that best serve your business without the negative tradeoffs. As your goals evolve, you have the freedom to make new choices including new tools and destinations, more comprehensive investigations, and new sources of data.

Cribl helps you get the data you want, in the formats you need, to wherever you want to go.

ABOUT CRIBL

Cribl is a company built to solve customer data challenges and enable customer choice. Our solutions deliver innovative and customizable controls to route security and machine data where it has the most value. We call this an observability pipeline, and it helps slash costs, improve performance, and get the right data, to the right destinations, in the right formats, at the right time. Join the dozens of early adopters, including market leaders such as TransUnion and Autodesk, to take control and shape your data. Founded in 2017, Cribl is headquartered in San Francisco, CA. For more information, visit www.cribl.io or our [LinkedIn](#), [Twitter](#), or [Slack](#) community.
